

SmartPly[®]

The Smart Answer to Plywood

FSC Supplier

smart thinking...

If you want to build smart, you've got to think smart. To find better quality and better value, you've got to look beyond the obvious.

That's why the smart money goes on SmartPly. SmartPly doesn't delaminate and has no knot-holes, core voids or other structural defects and is less expensive than plywood. It's bonded with waterproof glue for exterior use and is ideal for flooring, roofing, wall sheathings, site hoardings and lots of other general building uses.

It's The Smart Answer[✓] to Plywood

SmartPly is oriented strand board, or OSB. That's three layers of wood strands coated with waterproof resins interwoven in a lattice pattern and then compressed at high temperature to add extra strength, rigidity and moisture resistance.

SmartPly is Europe's leading brand of premium OSB.

garden sheds

SmartPly is made with exterior grade glue and is ideal for domestic uses such as garden sheds, dog kennels and rabbit hutches.

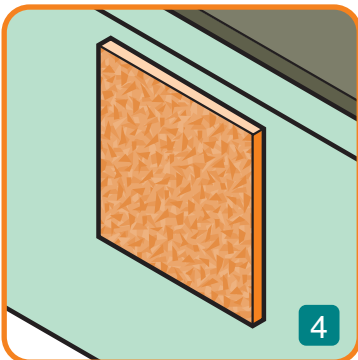

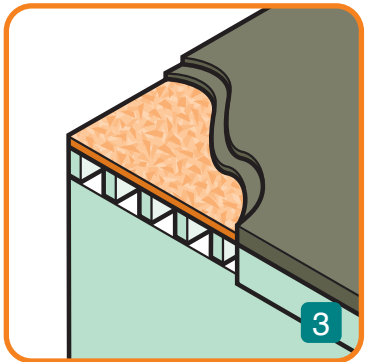

timber frames

SmartPly Frame is designed to provide a high-quality, rigid wall sheathing as part of a timber frame construction.

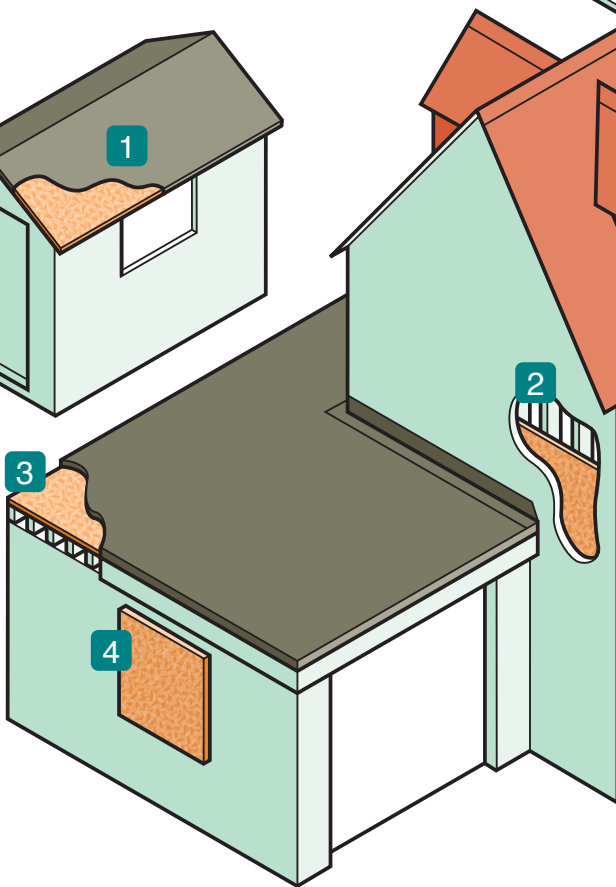

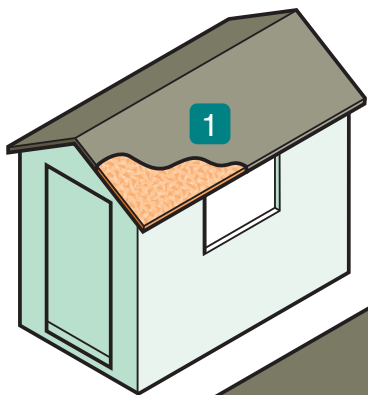

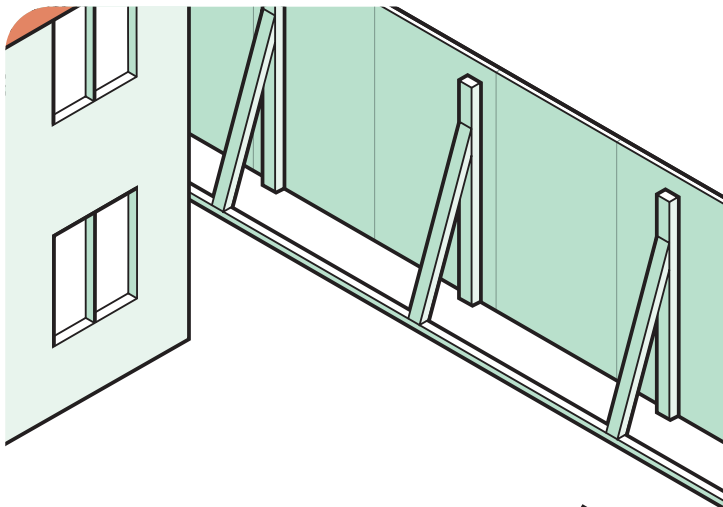

flat roofs

SmartPly Roof is designed for use as part of a recognised flat roof system, including load-bearing flat roofs and roof decks.

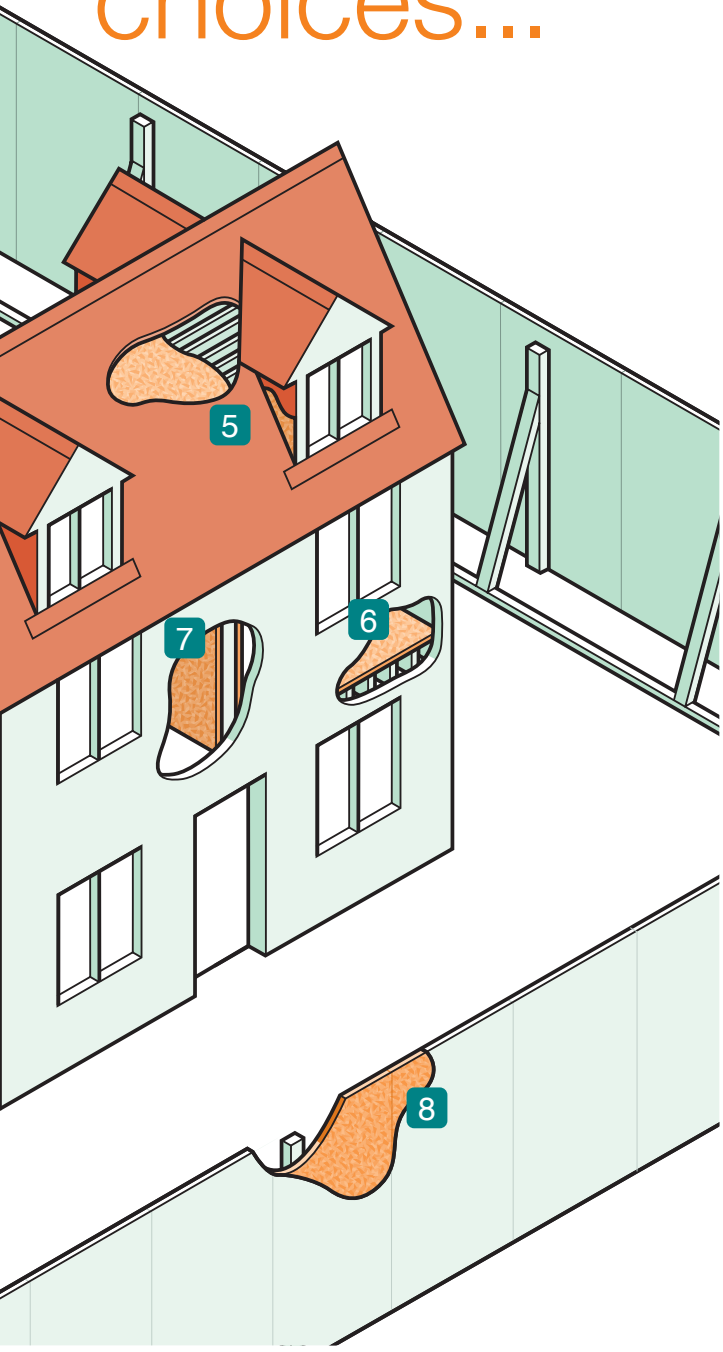

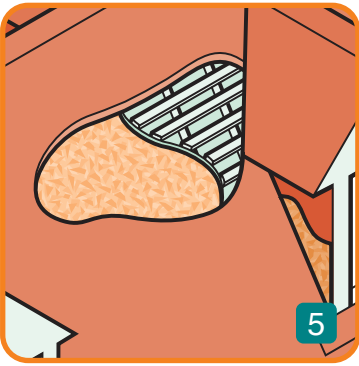

broken windows

SmartPly is just the job for general building uses such as boarding up windows, hoardings, packaging, pallet tops and signboards.

smart choices...

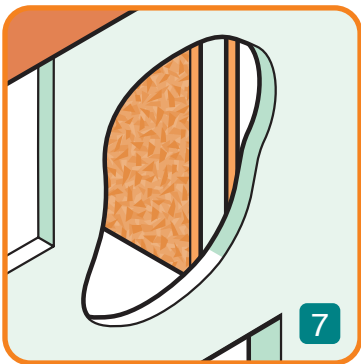

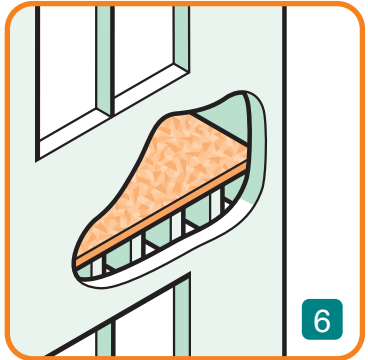

pitched roofs and dormer windows

SmartPly Roof is ideal for use on pitched roofs as a roof lining for slates or tiles (sarking). It is also a perfect solution when building dormer windows.

floors

SmartPly Floor has superior strength which makes it ideal for use in flooring applications. SmartPly Floor+ has a weather-resistant peel-off film giving extra protection against moisture and dirt during building.

partition walls

SmartPly has the all-round strength, stiffness and spanning capacity needed to make a rigid vertical partition wall.

hoardings

SmartPly makes durable hoardings that won't delaminate and, when painted, will resist dirt, knocks, scratches and the elements.
